About the Poster

This poster was designed for a college event celebrating World Prosthodontist Day 2025 and won First Prize. While the written content was provided, the overall concept, layout, and visual storytelling were entirely my creation. I used AI-generated cartoon characters to add humor and engagement, and designed the layout, colors, and comic-style elements from scratch using Photoshop & CorelDraw. The poster creatively highlights common denture issues in an educational yet entertaining format.

Thanks for Watching :)
